CAPABILITY STATEMENT

Majee Tech Inc

Company Overview

Majee Tech Inc is a Washington, DC–based information technology consulting and software development firm supporting government agencies and prime contractors. As a Certified Business Enterprise (CBE), the firm delivers reliable, secure, and maintainable technology solutions designed for regulated and mission-critical environments. Majee Tech Inc provides senior-level technical expertise with a focus on clarity, compliance, and long-term sustainability.

Core Capabilities

Custom Software Development
Design and development of secure, scalable web-based and enterprise applications supporting business operations, data workflows, and system integration requirements.

Cloud & Application Modernization
Modernization of legacy systems through cloud-ready architectures, application refactoring, platform upgrades, and vendor-hosted or internally hosted solutions.

IT Consulting & Technical Advisory
Senior-level consulting services supporting software implementation, solution architecture, technical assessments, system design reviews, and implementation guidance.

Data, Analytics & Machine Learning Solutions
Design and implementation of data processing pipelines, analytics platforms, and applied machine learning solutions to support reporting, insights, and decision-making initiatives.

Differentiators

- Certified Business Enterprise (CBE) with multiple preference designations

- Senior-level technical leadership and hands-on execution

- Experience supporting government and regulated environments

- Focus on secure, maintainable, and well-documented solutions

- Clear communication and dependable delivery model

Key Personnel Experience

Majee Tech Inc is led by a senior technology professional with extensive experience supporting federal and local government programs, including work performed as a **subcontractor and consultant** for agencies such as the **District of Columbia Department of Health Care Finance (DHCF)** and the **National Institutes of Health (NIH)**. This experience includes software development, cloud modernization, systems integration, and delivery of solutions supporting regulated, mission-critical environments. This background informs the firm's technical standards, delivery approach, and risk-aware execution model.
